---

## Summary

Results-driven Front-End Developer with over 3 years of experience designing and optimizing scalable web applications. Expertise in React.js, Next.js, state management libraries, and ERP solutions. Proven ability to enhance user experience, develop scalable systems, and collaborate effectively within Agile teams.

---

## Skills

- **Programming Languages:** JavaScript, TypeScript, HTML, CSS, Python

- **Libraries & Frameworks:** React.js, Next.js, Tailwind CSS, Material UI, Ant Design

- **Tools & Technologies:** Git, GitHub, Redux Toolkit, Zustand, RTK Query, React Query, REST APIs, Firebase, StimulSoft

- **Design & Development:** Responsive Design, Cross-Browser Compatibility, UI/UX Design

---

## Experience

**Front-End Developer** | Arian System, Tehran, Iran
*Aug 2024 – Present*

- Played a key role in developing the initial engine for a robust ERP product featuring over 20 modules.

- Developed and optimized complex reporting features using StimulSoft for dynamic report rendering.

- Integrated Firebase for real-time notifications, improving user engagement.

- Leveraged Next.js15, React.js19, RTK Query, Ant Design, and Tailwind CSS for high-performance front-end development.

- Collaborated cross-functionally to design scalable and maintainable solutions, ensuring seamless module integration by streamlining communication between backend and frontend teams, resolving integration challenges, and implementing efficient data-sharing protocols.

**Front-End Developer** | IPJ Company, Tehran, Iran
*Jan 2024 – Aug 2024*

- Developed scalable front-end architectures for health management and HR applications using React.js and Next.js.

- Optimized page load times by 20% through efficient state management with Zustand and RTK Query.

- Reduced bug incidents by 15% via rigorous debugging and performance testing.

- Mentored junior developers, fostering code quality and best practices.

- **Key Projects:**

  - *Health Cloude:* Health management web application using React18, Tailwind, Zustand, React Query.

  - *Meshkat:* Networking application built with Next.js13, Material UI, RTK Query.

  - *Toranj:* HR management system leveraging React.js18, Tailwind, RTK Query.

**Front-End Developer** | Touska Company, Tehran, Iran
*Nov 2021 – Dec 2023*

- Designed and implemented user interfaces using React, JSX, and CSS.

- Developed a dynamic portfolio and internal projects during freelancing period integrated into Touska's services.

- Ensured responsive design across multiple devices.

- **Achievement:** Increased user engagement by 25% through UI/UX improvements.

---

## Open-Source Contributions

- *Bright Resume Builder:* Simplified resume creation with customizable templates using Next.js and Tailwind CSS, currently in development stage.

---

## Certifications

- Meta Front-End Developer (Coursera, 2023)

- JavaScript & React.js (Code with Mosh, 2023)

- Design Patterns (Udemy, 2023)

- Python (Solo Learn, 2023)

- Machine Learning (Solo Learn, 2022)

- React.js (Udemy, 2022)

---

## Education

- MSc in Sports Engineering | Islamic Azad University (2020 – 2023)
  *Thesis: "AI & Machine Learning Applications for Sports Performance Optimization."

---

**Soft Skills**

- Teamwork: Successfully collaborated with designers and developers to deliver projects on time.

- Communication: Effectively conveyed technical information to non-technical stakeholders.

- Problem-solving: Applied creative and analytical thinking to solve complex problems.

- Attention to detail: Ensured quality and accuracy of code, designs, and deliverables.

---

**Languages**

- Persian: Native proficiency
- English: Advanced proficiency
