PROFESSIONAL SUMMARY

Frontend Developer with 4+ years of experience building enterprise-scale web applications using React, Next.js, and TypeScript. Experienced in designing scalable frontend architectures, micro-frontend systems, state management solutions (Redux Toolkit, RTK Query, Zustand), and large-scale ERP platforms. Skilled in performance optimization, Core Web Vitals, reusable design systems, and cross-functional collaboration in Agile environments.

CORE TECHNICAL SKILLS

Frontend: React, Next.js (SSR / SSG), JavaScript (ES6+), TypeScript, HTML5, CSS3

State & Data: Redux Toolkit, RTK Query, Zustand, React Query, RESTful APIs

Architecture: Modular Architecture, Design Systems, Micro Frontend, Monorepo

UI & Design: Ant Design, Material UI, Tailwind CSS, Responsive Design

Performance: Core Web Vitals (LCP, CLS, INP), Code Splitting, Lazy Loading, Bundle Optimization, Cross-browser Compatibility

Testing: Jest, React Testing Library

Tools & Practices: Git, GitHub, CI/CD, Firebase, StimulSoft, Agile / Scrum

WORK EXPERIENCE

Frontend Developer — Arian System, Tehran *Aug 2024 – Present*

- Architected and maintained the core frontend platform of a large-scale ERP system spanning 20+ business modules.
- Built and standardized shared component libraries, coding standards, and frontend architectural guidelines adopted across a team of 6 frontend developers.
- Standardized module architecture and project scaffolding, accelerating new-module setup and reducing integration effort across the frontend team.
- Developed a dynamic reporting platform using StimulSoft, delivering real-time business insights and operational analytics.
- Implemented Firebase-powered real-time notifications across ERP modules to improve responsiveness and user experience.
- Collaborated closely with backend, QA, and product teams to define API contracts and ensure high-quality feature delivery.

Frontend Developer — IPJ Company, Tehran *Jan 2024 – Aug 2024*

- Developed frontend applications for Health Cloud and HR management platforms using React and Next.js.
- Built the Health Cloud platform on a micro-frontend architecture, enabling independent development and deployment of features.
- Improved application performance by 20%, measured using Lighthouse and React DevTools Profiler, through state-management optimization with Zustand and RTK Query.
- Reduced production incidents by 15% through systematic debugging, performance profiling, and code-quality improvements.
- Mentored junior developers through code reviews and pair programming.

Frontend Developer — Touska Company, Tehran *Nov 2021 – Dec 2023*

- Built responsive and maintainable user interfaces using React and modern CSS.
- Reduced average task-completion time by 25% through UX and interface improvements.
- Developed internal tools and workflow integrations supporting business operations.

FREELANCE & SIDE PROJECTS

ScreenMe — FemTech / Women's Health Platform (Freelance) · screenme.co.uk

- Built the consultation booking flow for a UK-based FemTech platform offering at-home microbiome testing, using Next.js and Material UI.
- Structured the codebase as a monorepo to support shared packages and a consistent design system.
- Delivered responsive, accessible interfaces for a live healthcare product serving real customers.

Bright Resume Builder · github.com/mAmidMokhtari/bright-resume

- Developed and maintained an open-source resume-building platform using Next.js and Tailwind CSS.
- Structured the project using a monorepo architecture to support scalability, shared packages, and future feature expansion.
