PROFESSIONAL SUMMARY

Frontend Developer with 5 years building enterprise-scale web applications in React, Next.js, and TypeScript. Track record of architecting scalable frontend and micro-frontend systems, optimizing Core Web Vitals (LCP, CLS, INP), and leading shared component libraries adopted across multi-developer teams. Experienced in state management, design systems, testing, and cross-functional delivery in Agile environments.

CORE TECHNICAL SKILLS

Frontend: React, Next.js (SSR/SSG), TypeScript, JavaScript (ES6+), HTML5, CSS3

State & Data: Redux Toolkit, RTK Query, Zustand, React Query, REST APIs

Architecture & UI: Modular/Micro-Frontend Architecture, Monorepo, Design Systems, Ant Design, Material UI, Tailwind CSS, Responsive Design

Performance: Core Web Vitals (LCP, CLS, INP), Cross-browser Compatibility, Code Splitting, Lazy Loading, Bundle Optimization, Lighthouse

Testing & Quality: Jest, React Testing Library, Code Review, Pair Programming

Tools & Practices: Git, GitHub, CI/CD, Firebase, StimulSoft, Agile/Scrum

WORK EXPERIENCE

Frontend Developer — Arian System, Tehran

Aug 2024 – Present

- Architected the core frontend of a 20+ module ERP platform in React, TypeScript, and Next.js, establishing shared component libraries and architectural standards adopted by a 6-developer team.
- Standardized module architecture and project scaffolding, accelerating new-module setup and reducing integration effort across the frontend team.
- Built a real-time reporting platform (StimulSoft) and Firebase-powered real-time notifications, and collaborated with backend, QA, and product teams to define API contracts.

Frontend Developer — IPJ Company, Tehran

Jan 2024 – Aug 2024

- Built the Health Cloud platform on a micro-frontend architecture (React/Next.js), enabling independent development and deployment of features.
- Improved application performance by 20%, measured with Lighthouse and React DevTools Profiler, by optimizing state management with Zustand and RTK Query; reduced production incidents by 15%.
- Mentored junior developers through code reviews and pair programming.

Frontend Developer — Touska Company, Tehran

Nov 2021 – Dec 2023

- Built responsive, maintainable React UIs, reducing average task-completion time by 25% through UX improvements.
- Developed internal tools and workflow integrations supporting business operations.

FREELANCE & SIDE PROJECTS

- ScreenMe (FemTech, UK · screenme.co.uk) — Built the consultation booking flow using Next.js and Material UI in a monorepo with a shared design system; delivered responsive, accessible interfaces for a live healthcare product.
- Bright Resume Builder (github.com/mAmidMokhtari/bright-resume) — Open-source resume platform built with Next.js, Tailwind CSS, and a monorepo architecture.

EDUCATION

- M.Sc., Sports Engineering — Islamic Azad University, 2020–2023

CERTIFICATIONS

- [Meta Front-End Developer Professional Certificate](#) — Coursera/Meta, May 2023 (credential verified online)
