PROFESSIONAL SUMMARY

Frontend Developer with 4+ years building enterprise-scale web applications with React, Next.js, and TypeScript. Experienced in modular frontend architecture, scalable state management (Redux Toolkit, RTK Query, Zustand), and data-intensive platforms including large-scale ERP systems. Focused on performance, maintainable code, and cross-functional collaboration in Agile environments.

CORE TECHNICAL SKILLS

Frontend: React, Next.js (SSR / SSG), JavaScript (ES6+), TypeScript, HTML5, CSS3

State & Data: Redux Toolkit, RTK Query, Zustand, React Query, RESTful APIs

UI & Design: Ant Design, Material UI, Tailwind CSS, Responsive Design, Design Systems

Performance: Code Splitting, Lazy Loading, Bundle Optimization, Cross-browser Compatibility

Testing: Jest, React Testing Library

Tools & Practices: Git, GitHub, CI/CD, Firebase, StimulSoft, Agile / Scrum

WORK EXPERIENCE

Frontend Developer — Arian System, Tehran

Aug 2024 – Present

- Architected and maintain the core frontend engine of a large-scale ERP platform spanning 20+ business modules, standardizing module structure to speed up new-module onboarding and reduce cross-team integration effort.
- Built a dynamic reporting system with StimulSoft, delivering real-time analytics dashboards used daily by operations and management teams.
- Integrated a Firebase-based real-time notification layer across the platform, improving user feedback loops and overall responsiveness.
- Established shared component libraries, coding standards, and architectural guidelines adopted across all ERP frontend modules.
- Partnered with backend, product, and QA teams to align API contracts and maintain high, consistent code quality.

Frontend Developer — IPJ Company, Tehran

Jan 2024 – Aug 2024

- Developed frontend applications for a health-management platform (Health Cloud) and HR systems using React and Next.js.
- Improved application performance by 20% — measured with Lighthouse and the React DevTools Profiler — by refactoring state management with Zustand and RTK Query to eliminate unnecessary re-renders and redundant API calls.
- Reduced production incidents by 15% through systematic debugging, performance profiling, and code-quality improvements.
- Mentored junior developers through code reviews and pair programming.

Frontend Developer — Touska Company, Tehran

Nov 2021 – Dec 2023

- Built responsive, maintainable UIs with React and modern CSS for internal business applications.
- Reduced average task-completion time by 25% through targeted UX and interface improvements.
- Developed internal tools and workflow integrations supporting day-to-day business operations.

OPEN-SOURCE & SIDE PROJECTS

Bright Resume Builder

github.com/mAmidMokhtari/bright-resume

- Self-initiated, actively maintained open-source platform offering customizable resume templates, built with Next.js and Tailwind CSS.
